LOGOS 道科包装
PACKAGING

Our Factory

Since 2004, Logos Pack has been supplying secure and reliable flexible packaging materials for food and non-food industries. After over ten years of development, we have been accumulated rich experience from raw materials development right through to production and quality quality, we guarantee perfection in every products.

Logos Pack is a private business based in Guangdong, China. Our factory is accredited to several widely accepted standards including BRC, ISO22000, GMP, HACCP and has also achieved U.S. Food and Drug Administration.

Pet Food

In Logos Pack, we provide a custom flexible packagin solutiion for your pet food products, from stand-up pouches, flat bottom pouches, quad sea bags and other types of pet food packaging.

Coffee & Tea

We offer you a vast range of flexible food packaging bag solutions for your coffee and teas. You can choose from an extensive range of styles, sizes, shapes, colors and materials. With the addition of a one way degassing valve, the bags are perfect for coffee packaging.

Prepared Food & Condiment

Flexible packaging is an advanced food packaging solutions for prepared food and condiment packaging, they ensure product safety and increase user friendliness. With the features of tear notch, reclosable spout, etc., this style can minimize the mess in the kitchen while allowing them to screw on the cap to prevent any food spoilage.

Baby Food and Beverage

Flexible packaging is high portable packaging for baby food and beverage product. This type of packaging locks in nutritional and vitamin content while pushing oxygen and moisture out, the result of which wards off bacteria and maintains the high quality of the product inside. Pouches can be manufactured with additional convenient features like tear notch, reclosable zipper or spout, etc. making it great for travel.

Powdered Mixes

Our superior powdered mixes packaging delivers unparalleled protection that's necessary for your product to successfully maintain its freshness. Any of our reliable and leak proof bags ensure protection from elements such as moisture and air which can jeopardize your product's quality.

Detergent

Logos Pack's detergent packaging is laminated with a number layer of materials. The materials acts as a barrier to make sure the soap and detergent do not leak or spill and do not lose their properties for cleaning by exposure to dust or water vapor and give a longer shelf life to the product

Snack

Logos Pack supplies you the packaging solution for your snack food, to help you achieve objectives:

- Maintain freshness
- Enhance shelf appeal
- Protect against damage
- Add convenience
- Ensure required standards are met

Retort Pouch

Logos Pack's retort pouches are constructed from varying grade films which are laminated together. Material structure includes high barrier aluminium material or microwaveable clear material, could withstand temperatures ranging from 120°C to 135°C and provides the moisture-proof, oxygen-proof, strength, toughness, puncture and burst resistance that enable them to withstand the strenuous retort process.

Flat Bottom Pouch

Logos Pack offers a variety of different flat bottom pouches that are great for food and non-food type items. These compact flat bottom pouches make efficient use of your valuable shelf space. They can also easily stand and present themselves. Our flat bottom pouches come in many different varieties of materials, colors, and sizes so that you can put together the perfect packaging for your products.

Stand Up Pouch

Logos Pack offers you a wide range of stand up pouches for food packaging in clear and solid colors, glossy and matte finishes, and choice of materials. Choose from a variety of functional enhancements like reclosable zippers, degassing valves, tear notches and hang holes to suit your style.

Spout Pouch

The properties of Logos Pack's spout pouch:

- Excellent strength
- Unique looking with your logo
- Easy to carry, store and transportation
- Eco friendly FDA commitment materials.
- Excellent moisture-proof and oxygen-proof.
- Spout colors could be customized.
- Spout size is available from 8.5mm to 33mm in diameter.

Side Gusseted Bags

Our side gusseted bags are a very popular bag used to package ground or whole coffee beans, powdered mixes, nuts, loose-leaf teas, pet food and more. The narrow width of the gusseted bags make them perfect for sampling. Side gusseted bags are available in a wide selection of sizes and colors including gloss and matte finishes. They also come in block bottom or a quad seal construction that offers extra durability and capable of packaging heavier products. These work well with any of packaging accessories such as resealable tape, bag clips and tin ties. Our gusseted coffee bags are the perfect option for those who want to make a statement about their product.

Kraft Paper Pouch

Kraft paper pouches are the trend for now. A great natural look for your product. Available in various types and types in sizes. Choose from a variety of functional enhancements like reclosable zippers, degassing valves, tear notches and hang holes to suit your style.

Films

The roll stock film is used throughout many industries to form stand-up pouches, side gusseted bags, fin seal bag or 3 side seal bags, and other form-fill-seal applications. Our films include VFFS films, lidding films, barrier films, etc.
